

Unigrip™

FOR STACKING AND TURNING ROUND BALES

Unigrip has well proven design and a low net weight. It is used for the same tasks as Flexigrip. The choice between these two implements depends on the work routines of the individual user. Unigrip is also well suited for smaller square bales. The implement arms distribute the pressure evenly over a large area and this ensures careful handling of the bales. Unigrip gripping arms are made of large diameter tubes and have no sharp edges or welded joints. This prevents the plastic round the bales from being damaged.

UNIGRIP™	130	160
FOR BALE SIZES, MIN. MAX., CM	90-130	120-160
